SUMMARY

Revenue Analyst with a proven track record managing sales proposals, and building the systems and processes to help sales teams move faster and perform better.

EXPERIENCE

Moore, New York City — January 2025-Present

Revenue Analyst

- Owned quarterly sales performance reporting, validating CRM data and analyzing pipeline by vertical, opportunity type, and identifying trends to deliver dashboards to the Chief Revenue Officer.
- Served as RFP Project Manager across 25+ proposals representing $25M+ in annual pipeline value, partnering with sales leadership and cross-functional teams to manage proposal deliverables, ensure submission quality, and leverage salesforce data to improve future sales efforts.
- Conducted win/loss and gap analyses across sales proposals and RFPs, identifying strengths and weaknesses compared to comptitors, and opportunities to refine response strategy to strengthen future bids.
- Automated the invoicing for our Data Sales team, allowing on-time delivery of data deliverables and reducing invoice processing delays by 20% for the finance team.
- Partnered with top-performing sales reps as their operational lead, deploying systems that allowed them to spend more time prospecting rather than writing proposals.

AI Projects

Case Study Library

- Conducted discovery sessions with sales users to understand content retrieval challenges; designed and deployed an enterprise-wide case study repository, reducing retrieval time by 80%.
- Promoted adoption through lunch-and-learn sessions and live demos, showing sales teams how to find relevant case studies and incorporate them into pitches and proposals.
- Developed a Claude skill automating conversion of QBR results into collateral for the sales team.

Automating Sales Proposals with GraphRAG

- Prototyped a RAG proposal tool using Claude Code and Codex and tested assumptions and validated user needs through demos, conversations, and internal surveys.
- Led product management for an internal RAG proposal tool, conducting discovery sessions with sales teams to understand workflows and translate user needs into requirements; reducing RFP response time by 50%.

Moore, Washington, D.C. — May - August 2024

Marketing Intern

- Analyzed event attribution and performance data across 6 events to identify which conferences and activations drove outcomes, translating findings into recommendations for future marketing budget allocation.
- Partnered with the data team to translate product specs into marketing collateral for product launches and demos at conferences and events
